

Case Study

Name	Hill of Fiddes
Client	Broadview Energy
Project Type	Environmental Impact Assessment

Overview

Atmos Consulting provided quality control and data analysis to this 7.5 MW windfarm.

Atmos Consulting provided EIA project management, ecology, access and site design support, as well as coordinating public exhibitions and stakeholder consultations. NATS, MoD air defence, helicopter routing and Aberdeen airport issues were analysed by our staff and led to resolution of these key issues.
