

# Case Study

Name	Tirgwynt
Client	Awel Newydd
Project Type	44MW - Swept Path Analysis

## Overview

Atmos Consulting provided a detailed swept path analysis for a development in Wales in order to aid the successful construction of the 44MW windfarm.

Atmos Consulting was commissioned by Awel Newydd to undertake a detailed swept path analysis of 20 potential 'pinch points' on the proposed access route to the Tir Gwynt wind farm in mid-Wales. Oversails and remedial works were identified and documented in a report to the Local Planning Authority.
